PROJECTS – Built at Hackathons

Secret Manager – Built at EthIndia 2024

Secret Manager is a secure solution leveraging Lit Protocol to protect sensitive data, streamline secure transactions, and provide actionable insights through AI-powered analytics. It ensures trustworthy business operations by combining advanced encryption with real-time analysis for enhanced decision-making and seamless data management.

Decentralized Ticketing System - Unfold 2024

A blockchain-based ticketing system ensures secure and transparent transactions by preventing fraud, verifying user identities, and maintaining an immutable record of ticket purchases. Personalized user profiles track event participation and enable loyalty rewards, while organizers benefit from streamlined ticket sales, flexible seat options, and automated waitlists. The system removes geographical barriers, allowing global participation, and ensures accountability with traceable, logged transactions for both users and organizers.

Rasoi-Saathi - Technovate 2.0

Rasoi Saathi is a web-based platform aimed at reducing food waste and promoting food donations. The platform helps users track food expiry, provides leftover-based recipe suggestions, and connects them to nearby shelters or food banks for donating surplus food. Rasoi Saathi integrates real-time notifications, geolocation services, and a user-friendly interface to make food management and donations seamless. By bridging the gap between surplus food and those in need,
